Advanced Financial Reporting - Powered by LucaNet makes it possible to unlock financial data from any reporting tool or information system. LucaNet can extract data directly from Macola in addition to sources like Excel and other ERP-applications in order to enhance financial consolidation processes. Advanced Financial Reporting - Powered by LucaNet is easy to manage and useful for all financial professionals.

Application areas

- Direct ERP integration and data validation
- Financial reporting and analysis
- Financial and management consolidation
- Integrated financial planning
- Automatic cash flow generation and forecasting

Why would you use us?

To make your financial reporting more reliable, and less dependent on Excel. Setup one system in which you can manage all your financial reporting (P&L, balance sheet and cash flow), and your financial planning, reporting, and analysis. This new advanced product is so flexible and user friendly, that you, as a financial controller/manager remain in complete control of all processes, completely independent from your IT department.

Characteristics of the software

- **Simply Fast:** We apply the most innovative and modern technologies to create a fully integrated controlling platform, streamlining your complete legal consolidation and reporting needs.
- **Simply Reliable:** We incorporate the principles governing an orderly accounting system, while our standardized data model interfaces directly with 3rd party systems.
- **Simply Transparent:** Every transaction from the group to sub-group level can be traced down to the document level detail with just a few mouse clicks.
- **Simply Integrated:** This product offers an integrated data model for all your financial reporting, incorporating actual results with budget, forecast, and statistical data.
- **Simply Connected:** With over 200 ready-to-use connectors to all major accounting systems, we retrieve data at a transactional level, creating a level of integration that is unparalleled.
- **Simply Easy to Handle:** We know and understand our users. Therefore, our software is so easy to handle it is nearly solely administered by financial and accounting personnel.
- **Simply Implemented:** With our standardized financial reporting platform, our typical implementation normally takes 15 days, weeks faster than any other vendor.

One-on-one demonstrations available

See first-hand the benefits of this new product for advanced financial reporting. You can arrange an appointment for a presentation at
